LO: To identify compare plants in The Outback and the Great Barrier Reef

- What do you know about plants?
- Can you name any plants?
- Do you think plants are living or dead?

- Plants are living things.
- Just like us, plants need certain things in order to grow and be healthy. Do you know what they are?

Water

Plants need water for many reasons...

- When you first plant a seed, water is needed to help turn the seed into the start of a plant.
- Plants need water to suck up nutrients from the soil. Nutrients are the good things in soil which will help a plant grow and be healthy.
- The leaves of a plant need water to help it turn sunlight in to food.

Children should try to drink around five glasses of water a day. Plants need water to grow and be healthy too!
